### Benefits

#### Peaceful and friendly

Loud noise can upset a person's mood. It can be uncomfortable for certain people like children or the elderly. This hand dryer is one of the quietest in its class, proven by Quiet Mark approval.

#### Great drying experience

A user is never disappointed with the performance of this hand dryer. When you walk away your hands are fully dried with minimum effort.

#### Cost saving and environmentally friendly

The energy used by the Ecoforce is minimal, making sure your running costs are small. You'll notice massive reductions in what you spend compared to a traditional energy hungry hand dryer or buying paper towels. You will also be having a huge positive impact on the environment.

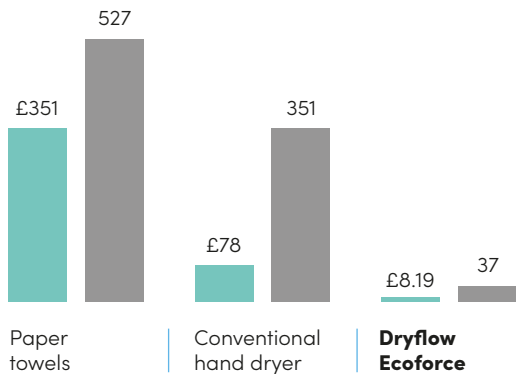

#### Fits anywhere

A small wall footprint, yet it delivers a big performance. This beautifully designed, compact hand dryer will not be hard to locate in a washroom of any size and decoration.

#### Improves bathroom environments

It even takes away the bad odours found in a bathroom. An inbuilt ioniser cleans the air and an optional fragrance can be purchased to blow pleasant aromas across the entire washroom.

### Annual cost and carbon production (Kg/CO<sup>2</sup>) for an office of 20 people\*
