Specification

Dry Time Range	15 – 20 Seconds
Rated Power	0.6 – 2 kW
Cost per 1000 dries	40p – £1
Finishes and Codes	White (DFVP01) Brushed Satin (DFVP02)
IP rating	IPX1
Dimensions	Height 325mm Width 310mm Depth 188mm

RECOMMENDED TRAFFIC:
<300 uses a day

GUARANTEE PERIOD:
3 years

Benefits

Precision blade technology

Both hands experience the full blade style drying effect of this high-speed hand dryer without getting in the way of each other, creating rapid dry times. The precise angles of the blades make sure water is scraped away from the user, preventing splashback.

Stylish and beautifully crafted

The Viper radiates class. Its exquisitely designed, silky contours add finesse to any washroom including those in the most lavish of establishments, creating a positive experience.

Discreet and unobtrusive

The noise level emitted will not interrupt a peaceful and friendly ambience. This Quiet Mark approved hand dryer is suitable when requiring satisfactory drying times, yet minimal interruption to conversations, working atmospheres or indeed the ears of vulnerable adults and children.

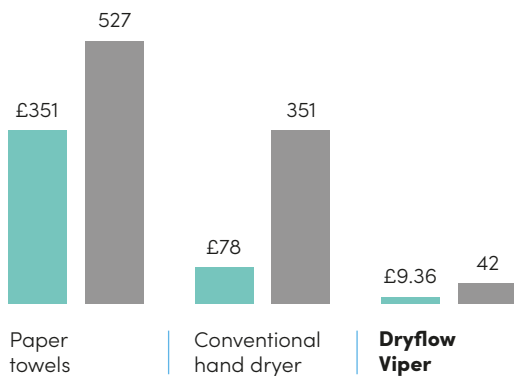

Cost saving and environmentally friendly

The Viper will save you considerable money and energy use compared to a conventional hand dryer or constant replenishment of paper towels. You get to decide if you want the heater element on or off and you can reduce the motor speed. You have the control at your fingertips.

Hygienic filtration

Purified air is forced from the bladed nozzles. A high grade HEPA filter sieves it of bacteria and dirt particles before it reaches the hands.

Annual cost and carbon production (Kg/CO²) for an office of 20 people*

To learn more, call us on **0114 354 0047**, email sales@ihdryers.co.uk or visit intelligenthanddryers.com

*FIGURES BASED ON:
20 people in an office location visiting the bathroom 4.5 times a day, 260 times a year / Conventional hand dryer rated at 2.5kW with 40 second dry time / Hand dryer at most energy efficient setting if applicable / Hand dryer cost at 12p per kW/h / 3 paper towels taken per bathroom visit at 0.5p a paper towel / Hand dryer carbon production using Carbon Trust standard of 1kW/h = 0.54 Kg/CO² / Paper towel carbon production using 22.5gms/CO² per dry (3 paper towels) / The above is an example for illustrative purposes only, actual figures of your location may vary
