**Rated Power** 1 kW

**Cost per 1000 dries** 73p

**Finishes and Codes** White (DF05M2W)  
Polished Chrome (DF05M2PC)

**IP rating** IP23

**Dimensions** Height 350mm  
Width 258mm  
Depth 100mm

Dryflow  
Elite  
MK II

RECOMMENDED TRAFFIC:

**>500 uses a day**

GUARANTEE PERIOD:

**5 years**

## Benefits

### Perfectly complements any washroom decoration

If your washroom is modern and sophisticated, the last thing you want is a hand dryer to let it all down. This hand dryer complements the most luxurious of bathrooms with its attractive design and profile.

### Improved energy efficiency

Quiet hand dryers that rely on a heater element rather than the speed of the motor to dry, can be very energy hungry. This isn't good for the environment or your energy bills. The Dryflow Elite MKII is an exception to this and can produce a great drying experience at just 1kW rated power.

### A motor life that exceeds most others

When you buy a hand dryer you want it to last. Most quality high traffic hand dryers have a motor life of 3000 – 4000 hours and give years of service. This has a motor life of 17,000 hours! Whatever your traffic level, this motor will keep running for years beyond most others on the market.

### Quiet yet good performing

Some locations require low noise products. One reason is loud noises can scare children and vulnerable adults. Another is that the noise from one area of a building into another can be distracting. This Quiet Mark approved hand dryer is one of the quietest in its class that can still produce dry times that leaves no user disappointed.

### Ultra slim profile

The amount of space available in a washroom can restrict product choices. At just 100mm depth it takes up hardly any space. This reduces the chances of bumping into it, or other people, in confined spaces. It also looks great as it doesn't protrude too far from the wall. The sloped nature of the cover minimises the chances of someone leaving objects on top of it.

### Made to the highest standards

This UK designed and built hand dryer is one of the most robust available. With both the cover and back plate being made of high-grade stainless steel, secured by anti-vandal screws, they are suitable for unforgiving environments.

## Annual cost and carbon production (Kg/CO<sup>2</sup>) for an office of 20 people\*
