

RECOMMENDED TRAFFIC:
>500 uses a day

GUARANTEE PERIOD:
5 years

- Low energy
- Fast drying

Fast drying, compact and water vaporising

User drying perception: amazes and astounds

Water collection tray included as standard

An attractive blade style hand dryer that's tiny
- fits anywhere

High speed yet low noise, a perfect balance

HEPA filter and advanced hygiene technology
as standard

Easy maintenance diagnostic system

Specification

Dry Time Range	10 – 15 Seconds
Rated Power	1 – 1.5 kW
Cost per 1000 dries	37p – 55p
Finishes and Codes	Graphite (DFVAP1G)
IP rating	IP21
Dimensions	Height 540mm Width 320mm Depth 180mm

RECOMMENDED TRAFFIC:
>500 uses a day

GUARANTEE PERIOD:
5 years

Benefits

Fierce yet friendly

When you dry your hands, you want it done quickly. This is one of the fastest drying hand dryers in the world. At the same time, it provides a peaceful noise level, keeping users completely satisfied without being exposed to a sound comparable to a jet engine.

Prevents excess water on walls or floors

There's nothing worse than having to constantly dry the floors when excess water drips down the side of this type of hand dryer. Water is driven into a hidden, easy to empty collection tray. Maximising health and safety.

Compact and trendy

Compared to other blade style hand dryers this is tiny. A stunning model, with fashionable LED lights gives it a real modern appearance. Any size washroom will be able to accommodate comfortably, whilst complementing and improving the decoration of it.

Good for the environment and your annual budget

This long life unit will dramatically reduce energy bills compared to a conventional hand dryer. You will also significantly save money year on year compared to constantly replenishing paper towels. Not to mention having a major positive impact on the environment with its low carbon production.

Intelligent heating system

This unit thinks for itself, automatically keeping the temperature of the airflow comfortable, with no need for someone to remember to do it. If the rooms cold it will add heat. If it's a warm day it doesn't. This makes sure you do not waste any energy unnecessary. A smart way to keep money in your pocket, minimise impact on the environment and keep users happy.

Advanced hygiene technology

Washroom cleanliness is essential. A high grade H14 HEPA filter purifies the air taken into the hand dryer of 99.5% microbes. This filter is easy to access and cleanse. Nothing but clean air is blasted over the hands. For added piece of mind it's made with antibacterial ABS; the plastic is injected with silver ions which prevents the growth of bacteria, fungi and mould.

What's wrong? Find out quickly and easily

If a fault should occur or general maintenance is required, you are quickly notified via a LED display system. It will outline exactly where the malfunction lies, making it easy and simple to diagnose and rectify. You'll get it back in service at no time at all.

Annual cost and carbon production (Kg/CO²) for an office of 20 people*
