

Soft Touch Product Range

Washroom dispensers made from plastic often reduce the user's perception of the washroom; they are functional and mass produced and do little to compliment the décor of a washroom. Soft-line dispensers and bathroom accessories form a family of visually related products. Made of plastic, they don't feel like plastic and offer a low cost yet stylish alternative to stainless steel.

The material is premium-quality ABS, to which we add colored mastebatches giving the specific color tone, and then we apply a transparent, soft-touch layer paint. This process of colour impregnation as opposed to coating creates products that appear higher quality and softer to the touch.

Soft-line dispensers are scratch resistant as a scratch will take off the soft-touch layer as opposed to the colour itself, giving the dispensers added longevity and maintaining a new and fresh look to even high traffic washrooms. Available in a contemporary range of colours.

Technical Description

Available in white, black, pea green and orange with a chrome-plated push button and transparent window to view level. Impact-resistant ABS with Polyacetal plastic pump which offers enhanced chemical resistance and mechanical strength. Wall-mounted with key lock on top of the unit. Distinctive 'Soft line' family appearance.

714-716 Soft Touch Soap Dispenser

The Soft Touch soap dispenser is available in a bulk refill liquid 550ml (714) or a 500ml foam system with replacement cartridge (716). Soft Touch dispensers take on modern and creative forms and are available in a variety of contemporary finishes to compliment the modern 'away from home' washroom. The compact 500ml and 550ml capacities are suitable for low to mid-level traffic washrooms that wish to retain a minimal feel. The foam option offers more hand washes from the same sized dispenser.

Technical Description

Available in white, black, pea green and orange transparent window to view level. Impact-resistant ABS. Wall-mounted with key lock on top of the unit. Distinctive 'Soft line' family appearance. Wall-mounted with fischer screws provided. Requires modification for thin (1ply) paper.

780 Soft Touch Auto-Cutting Hand Roll Dispenser

This dispenser is designed for washrooms and kitchen areas that wish to exert greater control over usage and also provide larger towels for more comprehensive drying. Paper is automatically cut by mechanical mechanism as the towel is pulled down which prevents handfuls being grabbed as can be the case with pre-folded paper towels. This system provides a neater and less messy system for commercial washrooms. Soft Touch dispensers take on modern and creative forms and are available in a variety of contemporary finishes to compliment the modern 'away from home' washroom.

Dimensions

Technical Description

Available with a die cast aluminum cover (brushed satin or polished chrome) with black ABS underside and front panel or anti-bacterial impregnated ABS (white) with black underside and polished chrome ABS front panel. Internal dryer is constructed of flame retardant and lightweight ABS, enclosed motor offers IP23 class II protection. Working parts can all be removed independently. High performance 26,000 or 32,000 universal vacuum brush motor generates 202 mph air speed through compressed strip air outlet. UV activation light. Automatic IR sensor detection (variable 5-20 cm). HEPA filter holder fitted above the motor where airflow is drawn from. Automatic disconnection after 60 seconds.

GF-01/02/03/01T/ 02T/03T Soft Touch High Performance Hand Dryer

This hand dryer is elegantly designed for low to medium traffic washrooms (200 -400 uses per day). Available in three finishes and in an Eco (550 watt) or Turbo (1100 watt) version, it is both high performance and energy efficient. It offers realistic dry times of between 15 and 20 seconds while consuming 75% less energy than traditional warm air hand dryers. The hand dryer incorporates a HEPA filter that traps 99.97% of airborne bacteria and viruses over 0.3 microns.
