##### *Childcare Accommodation*

Koala Kare KB110-SSRE Stainless Steel Recessed Baby Changing Station

##### *Cubicle & Shower Accessories*

B-5806 Series Straight Grab Rail

B-69997 Surface-Mounted Toilet Tissue Dispenser

B-270 ConturaSeries Surface-Mounted Sanitary Napkin Disposal

B-5193 Folding Shower/Dressing Area Seat

### Project: Microsoft Headquarters, Costa Rica

## Soft on the Environment, Easy on the Eyes

When Microsoft relocated its Costa Rican workforce to the Torre Universal complex in San José, its new Costa Rica headquarters became the company's largest operation in Latin America. Designed by globally renowned architecture firm Gensler, Torre Universal is a Class A+ corporate centre that earned LEED® Gold certification due in part to its sustainable operating strategy — including reducing water use by over 50% and using rainwater for irrigation and toilets.

Maintaining sustainability, without compromising on high standards for design and hygiene, were important considerations for Microsoft's washrooms. Bobrick accessories helped realise the ideal balance of efficiency and design sensibility.

## Now Installing Updates

Before Microsoft could reboot at their new location, they needed washroom accessories that would minimise energy use, reduce waste and support effective handwashing and drying.

Bobrick's B-7125 InstaDry™ Hand Dryer helped meet sustainability goals and reduce energy expense with its best-in-class power rating of only 200 watts. B-858 Designer Series Automatic Soap Dispensers were selected not only for their Polished Chrome finish, but also their top-fill convenience — utilizing economical universal soap instead of wasteful proprietary soap cartridges.

B-38033 TrimLineSeries 3-in-1 units were also installed throughout the washrooms to provide added sustainability and hand drying versatility. Bobrick 3-in-1 units come with a built-in folded paper towel dispenser as well as an air dryer to provide two environmentally conscious hand drying options to satisfy diverse user preferences.

## SAVING PAPER

Bobrick 3-in-1 units, such as the B-38033, come standard with built-in TowelMate™ accessories, helping to reduce folded paper towel use by up to 20%.
